Pham Manh

Portfolio

Software Engineer with 4+ years of experience building and maintaining scalable web applications across frontend and backend. Proficient in Typescript, React, Next.js, Node.js, with a strong focus on code quality, performance, and user experience. Passionate about learning new technologies and applying them to solve real-world problems.

Education

- **Hanoi University of Civil and Engineering** *Sep 2019 - April 2024*

Technical Skills

Languages: TypeScript, JavaScript, Java, Dart
Frontend: React, Next.js, HTML/CSS, Flutter, MUI, TailwindCSS
Backend: Node.js, NestJS, ExpressJS, Java Spring Boot
Databases: PostgreSQL, MySQL, MongoDB
Platform & Cloud: Docker, Kubernetes, AWS, Linux, Git

Experience

- **SotaTek** *Hanoi*

  Software Engineer July 2025 - Present

SotaTek is a global IT outsourcing and consulting company that helps businesses digitally transform using cutting-edge technologies like AI and blockchain, with a strong focus on scalable, cost-effective solutions.

Project: Bloom

– Description: Bloom is designed to help growers and food & beverage companies shift toward regenerative, nutrient-dense agriculture without compromising productivity or profitability.
– Position: Fullstack Developer
– Tech-stack: Typescript, NextJs, ReactJs, TailwindCSS, NestJS, PostgreSQL
– Responsibilities:
  · Set up the shared frontend foundation, including scalable structure, configuration patterns, and reusable components.
  · Developed and maintained responsive Next.js and React features across desktop and mobile web experiences.
  · Designed PostgreSQL data models and built NestJS REST APIs for core application services.
  · Integrated AI agents and ML-powered recommendation features into field guidance and FarmGPT workflows.
  · Participated to code reviews, technical discussions, and implementation standards across the team.

Project: StackTrading

– Description: Stack Trading is a Future/Forex prop-trading.
– Position: Fullstack Developer
– Tech-stack: Typescript, NextJs, TailwindCSS, NestJS, PostgreSQL
– Responsibilities:
  · Developed and maintained responsive Next.js features across desktop and mobile web experiences.
  · Implemented backend service using NestJS to support core platform capabilities.
  · Designed PostgreSQL database.
  · Integrated third-party services for trading workflows and external platform connectivity.
  · Participated to code reviews, technical discussions, and implementation standards across the team.

Project: Mint

– Description: A Web3 iGaming & Entertainment Platform.
– Position: Fullstack Developer
– Tech-stack: Typescript, NextJs, ReactJs, MUI, NestJS, PostgreSQL

– Responsibilities:
  · Developed and maintained the main web application and Telegram Mini App for Web3 users.
  · Built reusable React and MUI components to speed up UI delivery across high-engagement product screens.
  · Implemented backend service using NestJS and PostgreSQL to support core platform capabilities.
  · Integrated third-party services for Web3 workflows and external platform connectivity.

- **Ominext** *Hanoi*

Software Engineer July 2024 - June 2025

Ominext is a professional IT services company that specializes in producing and outsourcing software for global market.

Project: NOVA

– Description: NOVA (also known as NOVA Japan) is a well-known English language school and e-learning platform in Japan, offering interactive English lessons through both in-person and online formats. The NOVA app complements their services, providing students with tools for learning English conveniently.
– Position: Front-end Developer
– Tech-stack: Typescript, NextJS, Flutter, Java Springboot, PostgreSQL
– Responsibilities:
  · Supported migration from a legacy Java/JSP stack to a modern Spring Boot and Next.js architecture.
  · Developed responsive React and reusabled UI components for learner-facing web flows across devices.
  · Investigated and resolved critical issues across web and Flutter mobile applications to improve product reliability.

Project: MTB

– Description: An Ed-tech system for teaching Alzheimer's patients.
– Position: Fullstack Developer
– Tech-stack: Typescript, NextJS, Python (Flask), PostgreSQL.
– Responsibilities:
  · Set up the application structure, reusable components, and configuration patterns for the development team.
  · Built responsive Next.js features for patient-focused learning workflows.
  · Coordinated task breakdown and assignment to keep delivery aligned across the team.
  · Optimized code paths and resolved defects to improve application stability.

Project: Nursingcare

– Description: A system to manage nursing homes and a combined application allows nursing staff to update the patient's status and the patient's family members to monitor the condition of their relatives.
– Position: Front-end Developer
– Tech-stack: Typescript, ReactJS, Java Springboot, PostgreSQL.
– Responsibilities:
  · Built the shared frontend structure, component patterns, and configuration for the development team.
  · Developed responsive interfaces for both operational staff and family-facing users in end-to-end care workflows.
  · Supported team execution through task breakdown and alignment across contributors.
  · Investigated and fixed production defects in core features.

- **Rencity** *Hanoi*

Full-stack Developer Aug 2023 - July 2024

Rencity is a rental connection platform for rooms and apartments, designed to make the process of finding and managing rentals easier and more efficient.

Project: Rencity

– Tech-stack: Dart, Typescript, Flutter, Next.js, NestJS, MySQL.
– Position: Full-stack Developer
– Responsibilities:
  · Maintained and optimized product features across web and mobile surfaces.
  · Participated in sprint planning, task breakdown, and assignment to support effective team execution.
  · Developed the web application version alongside the existing platform experience.
  · Integrated third-party services to extend business workflows.

- **Tesosoft** *Hanoi*

  Front-end Developer April 2022 - July 2023

Established in 2019, Tesosoft is an IT digital development company specializing in advanced websites, applications, and business systems with custom designed solutions.

Project: AMK

– Tech-stack: Typescript, ReactJS, NextJS, NestJS, PostgreSQL.
– Position: Front-end Developer
– Responsibilities:
  · Implemented product features for the client application in Next.js and the admin portal in React.
  · Improved responsive UI/UX for both customer-facing and internal workflows.
  · Implemented task assigned by lead developer.

Project: Aiwado

– Tech-stack: Typescript, ReactNative, ReactJS, NestJS, PostgreSQL.
– Position: Front-end Developer
– Responsibilities:
  · Implemented customer-facing functionality for the React Native app and the React admin platform.
  · Improved usability across mobile and web experiences.
  · Implemented task assigned by lead developer.
